DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 15-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent No. 5,268,739 to Martinelli et al (hereafter Martinelli).

As to claims 1 and 15, Martinelli discloses an apparatus for measuring the velocity of a fluid including (see Figure 3 below):

an optical interferometer with measurement (60) and reference (58) arms;
an acousto-optical modulator in one of the arms (56, see also column 6, lines 32-37);
detectors configured to make a measurement of the interfered light and use that measurement to determine the speed of the portion of the sample.

Art Unit: 2877

As to claims 3 and 16, Martinelli discloses determining the velocity, or signed displacement of the portion of the sample (see columns 7 and 8).

As to claims 4, 5, and 17, Martinelli discloses a low-coherence light source, and art-recognized substitutions therein (see column 8, lines 36,37).

As to claims 6 and 20, Martinelli discloses varying the length of the reference arm (55, 68, 69).

As to claims 18 and 19, Martinelli discloses finding the speed as a function of depth (x_1 , ..., x_n , see also column 7).
